## Overview of AceFTP 3 Pro

---

- **Work in a user-friendly environment**

AceFTP 3 Pro's conveniently designed interface provides you with instant access to execution of all predominant tasks associated with file transfers. The intuitive design of the interface reduces the learning curve enabling quick mastery of even the most advanced features. The familiar Windows XP-style interface makes it easy to navigate through AceFTP 3 Pro. It can also be personalized to match your work preferences and habits. AceFTP 3 Pro's ergonomic design guarantees maximum ease of use and efficiency.

- **Make file transfers secure and confidential**

AceFTP 3 Pro software integrates features that ensure the secure, confidential transfer of your information over the Internet. The SSL security protocol now integrated in AceFTP 3 Pro ensures the secure transfer of information between any server and the user's local computer. You can now safeguard your confidential information with easy-to-implement password protection. For additional security, each user on the network has his or her own profile and cannot access other users' connections.

- **Plan and automate your transfers**

With the new File Transfer Scheduler, AceFTP 3 Pro offers flexibility and timesaving opportunities for you to exploit. You can now schedule the optimal time to execute your file transfers. Imagine, for example, being able to schedule your queued files for night time transfer or for transfer when your Internet connection is least busy. With this capability, you can execute regular backups and update your Web site at a predefined date and time. This feature also lets you automate your file transfers. You can schedule file transfers to occur whenever you choose—for example, daily, monthly, or upon start-up. You can even use scripts to program the execution of your tasks.

- **View the status of your file transfer in a single glimpse**

The Transfer Rate Viewer feature shows the status of your current file transfers. One glimpse at the easy-to-understand graphic lets you see the progress of file transfers in real time.

- **Maximize the efficiency of your transfer operations**

Take advantage of the flexibility AceFTP 3 Pro brings to file transfers. You can now have numerous concurrent connections and run multiple transfers simultaneously—with astonishing ease! You can also make direct server-to-server transfers, eliminating the need to use your local PC as an intermediary step. To save valuable time, AceFTP 3 Pro can also resume interrupted transfers of data, transferring only the remaining data rather than starting the file transfer from the beginning.

## **Discover the New Features of AceFTP3 Pro:**

---

- **SSL Security Protocol Integration**

The inclusion of the SSL protocol ensures the privacy and confidentiality of your file transfers.

- **Password Protection**

You can also protect your software by assigning a special encrypted password so no one but yourself can view and control your file transfers.

- **New File Transfer Scheduler**

Now you can completely automate your file transfers. You may schedule transfers to occur on an individual or recurring basis—daily, monthly, or upon computer start-up, for example. Scripts can be used to program the execution of your tasks.

- **Increased Firewall Support**

Versions 4 and 5 of the SOCKS protocol are integrated to support more types of firewalls.

- **Windows XP-Style Interface**

You can work comfortably in an interface with the familiar Windows XP look and feel.

- **Improved Management of Your Queued Files**

Save your queued lists for later transfer. Queued files can be saved and transferred at a more convenient time with the aid of the File Transfer Scheduler.
