New Features Overview

New Features of AceHTML 6 Pro

- File Editing Directly from the Server
- Server Mapping
- Improved Interface
- Code Snippets
- ASP and PHP Code Completion
- ASP and PHP Syntax Checker
- Full-Site Link Checking

***File Explorer* allows you to open FTP connections.**

Web Development Support

File Editing Directly from the Server

To make your job easier, AceHTML 6 Pro's *File Explorer* integrates FTP connections that allow you to open your Web pages directly from the server. Hence, you save time and effort by avoiding numerous file transfer operations between your workstation and the server.

Server Mapping

ASP and PHP developers will appreciate the ability to view server-side pages from within the AceHTML 6 Pro viewer.

Flexible and Customizable User Interface

AceHTML 6 Pro recognizes your need to work according to your preferences. Hence, its interface can be completely customized. Possibilities include:

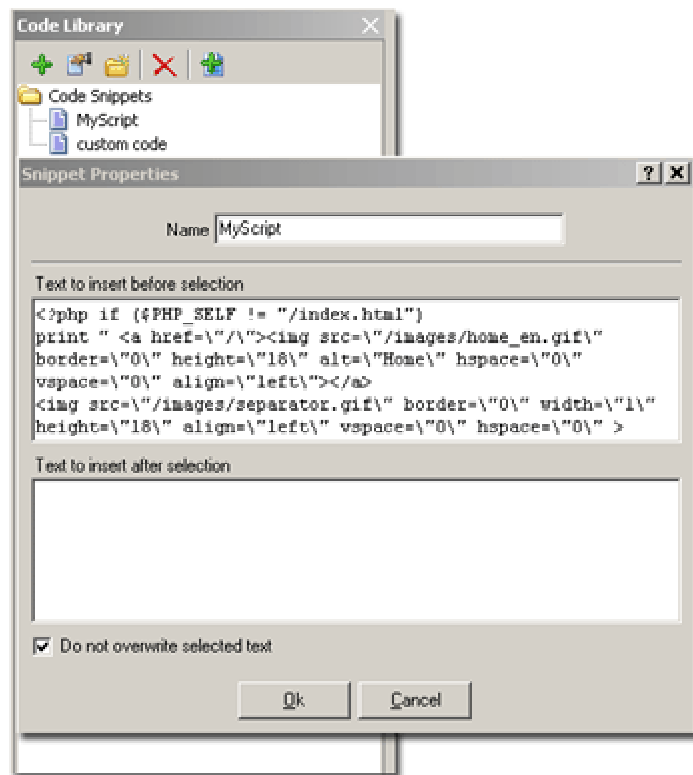

- Adding icons to or removing them from any toolbar
- Showing or hiding a toolbar
- Creating new custom toolbars
- Customizing shortcut keys
- Docking and undock interface elements
- Saving or retrieving a customized user interface with the *Desktop Manager*

Code Reuse

Code Snippets Library

The new *Code Snippets* feature gives you tremendous flexibility with regard to code reuse. You can instantly save any piece of code—whether it's HTML, CSS, JavaScript, ASP, or PHP—and insert it later in your Web page with a single click.

Store lines of code that you want to reuse in the *Code Snippets Library*, located on the explorer pane.

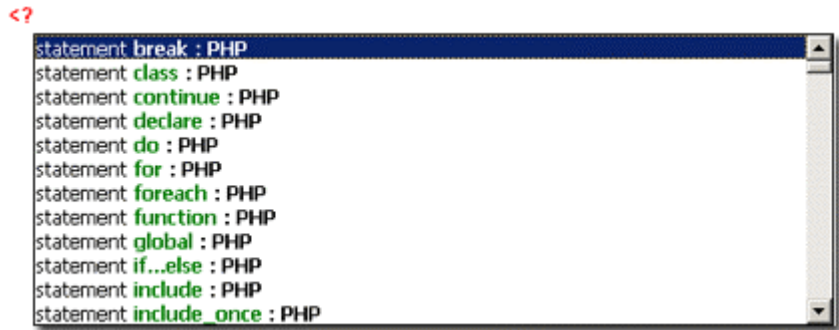

Coding Support

More Efficient Coding in ASP and PHP

AceHTML 6 Pro's *Code Completion* feature cuts your ASP and PHP development time. It automatically shows ASP and PHP functions and properties as you type.

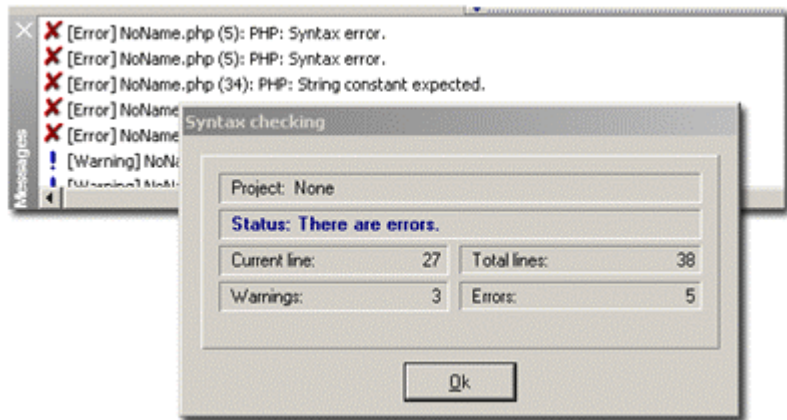

Code Completion can insert HTML, CSS, ASP, and PHP commands as you type.

Code Validation

AceHTML 6 Pro provides a powerful *Syntax Checker* that makes it possible to check for errors in ASP and PHP in addition to HTML, CSS, and JavaScript code. The *Syntax Checker* can save a significant amount of debugging time.

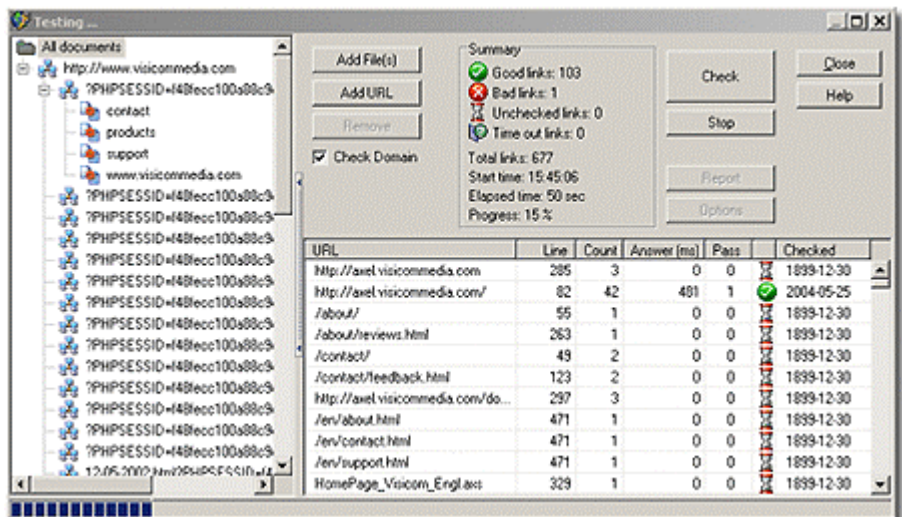

Syntax Checker can detect any syntax error in HTML, CSS, JavaScript, ASP, or PHP coding.

Quality Assurance

Full-Site Link Checking

AceHTML 6 Pro boasts an even more powerful *Link Checker* that can scan your entire Web site to validate all links. Within a few minutes, you get a full report showing active and broken links.

Thanks to an impressive array of design tools that provides extensive functionality and ease of use, AceHTML 6 Pro is one of the most feature-rich HTML editors on the market.

About Visicom Media

Visicom Media Inc. is a worldwide leader in the development of innovative, quality tools for the Internet. Visicom Media strives to find creative solutions to help its customers take advantage of the newest technologies with maximum efficiency.

Solutions

Visicom Media develops and markets Internet productivity software. Its award-winning software, AceHTML Pro, AceFTP Pro, and AceDesign Pro, enables professionals and Internet novices alike to build and manage Web sites. The company's applications are recognized worldwide for their ease of use, efficiency, and quality.

Visicom Media combines its software development expertise with its experience in Web development. The company's GoGraph.com Web site, a graphic search engine that operates in eight languages, provides its numerous visitors with a unique solution for searching, managing, and acquiring more than 70,000 images.

The company also markets Mioplanet's technology, a unique and innovative approach to developing software applications with Web content. Mio enables developers to remove the static interface of the browser, distribute Web content in one .mio or .exe file, and deliver any content directly to users' desktops.

The Visicom Media toolbar technology demonstrates the company's capabilities in merging Web functionality and software development. The toolbar docks to users' browsers to let them access the resources of the Web site it features. It's the ideal solution for large and small portal sites.
